Education

JSS Academy of Technical Education Noida

Oct. 2023 – Present

Bachelor of Technology in Information Technology

Noida, UP

Technical Skills

Languages & Tools: Python, Java, SQL (MySQL), Tableau, Git, GitHub, Azure AI Studio, AWS Services
MLOps: Docker, Kubernetes, CI/CD Pipelines, MongoDB Atlas, MLflow, Prometheus & Grafana
Libraries & Frameworks: NumPy, Pandas, Scikit-Learn, TensorFlow, LangChain, OpenCV, PyTorch, ML Sys Design
Generative AI: RAG, AI Agents, Finetuning, LangChain, Transformers, NLP, CrewAI, N8N, Autogen

Experience

Defence Research and Development Organisation (DRDO)

June 2026 – Present

Research Intern

New Delhi, India

- Analyzed confidential flight recorder data from Indian fighter aircraft; developed trend analysis and predictive AI/ML models

Tellis Technologies Pvt Ltd

May 2025 – August 2025

AI/ML Developer Intern

Remote

- Implemented RAG systems, finetuned language models, and reduced model hallucinations

Open Source Contributions

Superagent (YC-backed: 6.6k+ Github Stars)

- Implemented URL security validation for PDF downloads to prevent SSRF attacks [View PR](#)
- Refactored guardrails tests into functional tests for improved reliability [View PR](#)

LiteLLM (YC-backed: 52k+ Github Stars)

- Fixed audio cost-per-second override bug, improving pricing accuracy [View PR](#)

Projects

Runwall – Zero-Trust Execution Governance

Python, FastAPI, OPA/Rego, Docker, Redis, JWT

- Intent-aware policy engine with semantic risk scoring; taint tracking engine defends against prompt injection by blocking untrusted data in sinks.
- Low-friction async approval workflow for high-risk actions; distributed quotas & adaptive rate limiting prevent runaway costs and infinite loop attacks.
- Auto-generates fully governed MCP tools from REST APIs, databases, and shell connectors; inherits audit logs, identity management, and reversible execution.

Daredevil – AI Surveillance System

GNN, RAG (Pinecone), Three.js, Supabase, React, Next.js

- Built AI-based surveillance system detecting suspicious activities in real time.
- Developed GNN to uncover hidden relationships in behavioral data.
- Implemented alert system via WhatsApp, email, and phone notifications.

Compliance QA Pipeline (Brand Guardian)

LLMOps, RAG, Azure OpenAI, Azure AI Search, Azure Video Indexer, LangGraph, FastAPI

- Built LLMOps pipeline to audit YouTube content using speech, OCR, and metadata extraction.
- Designed RAG system using Azure AI Search for grounded compliance checks.
- Orchestrated workflow using LangGraph for end-to-end pipeline execution.

Achievements & Certifications

- Leader of my Team in SIH 2025 Grand Finale and Two Times National Level Hackathon Winner
- Machine Learning 1 - [Columbia University](#) and AWS Cloud Practitioner Essentials - [AWS](#)
